Contents of Volume 20 2006

Number 1 January–March 2006

Editorial: Work & Stress comes of age: Twenty years of occupational health psychology *Tom Cox and Mary Tisserand* 1

Is there support for curvilinear relationships between psychosocial work characteristics and mental well-being? Cross-sectional and long-term data from the Whitehall II study *Leif W. Rydstedt, Jane Ferrie and Jenny Head* 6

Beyond demand and control: The contribution of organizational risk factors in assessing the psychological well-being of health care employees *S. Akerboom and S. Maes* 21

Prevalence of posttraumatic stress disorder symptoms in firefighters *Kevin S. Del Ben, Joseph R. Scotti, Yi-Chuen Chen and Beverly L. Fortson* 37

The importance of self-efficacy in the moderating effects of social support on stressor–strain relationships *Thomas A. Stetz, Melba C. Stetz and Paul D. Bliese* 49

Work motivation, organizational identification, and well-being in call centre work *Jürgen Wegge, Rolf Van Dick, Gary K. Fisher, Christiane Wecking and Kai Moltzen* 60

The association between blood pressure and work stress: The importance of measuring isolated systolic hypertension *Renate Rau* 84

Number 2 April–June 2006

Bricks without clay: On urban myths in occupational health psychology *Toon W. Taris* 99

Teamwork and associated psychological factors: A review *Thomas H. Rasmussen and Hans Jeppe Jeppesen* 105

Return to work: A comparison of two cognitive behavioural interventions in cases of work-related psychological complaints among the self-employed *Roland W. B. Blonk, Veerle Brenninkmeijer, Suzanne E. Lagerveld and Irene L. D. Houtman* 129

Work–home interference: How does it manifest itself from day to day? *Madelon L. M. Van Hooff, Sabine A. E. Geurts, Michiel A. J. Kompier and Toon W. Taris* 145

Using computerized ambulatory diaries for the assessment of job characteristics and work-related stress in nurses *Derek W. Johnston, Alexis Beedie and Martyn C. Jones* 163

Psychosocial factors and safety behaviour as predictors of accidental work injuries in farming *David J. Glasscock, Kurt Rasmussen, Ole Carstensen and Ole N. Hansen* 173

Number 3 July–September 2006

Understanding the experience of stressors: The use of sequential analysis for exploring the patterns between various work stressors and strain *L. Trenberth and P. Dewe* 191

Exploring work- and organization-based resources as moderators between work–family conflict, well-being, and job attitudes *S. Mauno, U. Kinnunen and M. Ruokolainen* 210

Work and mental disorders in a German national representative sample *U. Roesler, F. Jacobi and R. Rau* 234

Combined workplace stressors and their relationship with mood, physiology, and performance *B. T. Wellens and A. P. Smith* 245

Variables related to psychiatric sick leave taken by Spanish secondary school teachers *J. A. Moriana and J. Herruzo* 259

Success or failure? Interpreting and understanding the impact of interventions in four similar worksites *K. Nielsen, H. Fredslund, K. B. Christensen and K. Albertsen* 272

Number 4 October–December 2006

Measuring exposure to bullying at work: The validity and advantages of the latent class cluster approach *G. Notelaers, S. Einarsen, H. De Witte and J. K. Vermunt* 289

Beyond demand–control: Emotional labour and symptoms of burnout in teachers *G. Näring, M. Briët and A. Brouwers* 303

Is there a relationship between burnout and objective performance? A critical review of 16 studies *T. W. Taris* 316

Organizational change in the public sector: Augmenting the demand control model to predict employee outcomes under New Public Management *A. Noblet, J. Rodwell and J. McWilliams* 335

Evaluation of an intervention programme based on empowerment for eldercare nursing staff *I.-L. Petterson, H. Å. Donnersvärd, M. Lagerström and A. Toomingas* 353
